

MPLACE ENERGY

B2B Oil & Gas Procurement Marketplace | Software asset for acquisition / pilot

Live public demo (always-on): <https://mplace-vu4o.onrender.com>
Request private demo (admin / seller / full RFQ): </request-demo.html>
Source: GitHub [aleksandrsera329-netizen/mplace](#) | Stack: NestJS + PostgreSQL (Neon) + static storefront

1. What it is

Multi-vendor B2B marketplace for oil & gas equipment and MRO: catalog, cart/order list, RFQ (request -> supplier offers -> award), merchant desk, platform admin. Built to save a buyer 6-12 months of platform engineering versus greenfield.

2. Product features (demo-ready)

Area	What you get in the demo
Public storefront	EN catalog, search/filters, product cards, cart, RFQ entry, private-demo CTA
Procurement	Orders + RFQ workflow (open quotes, multi-supplier offers, award path)
Suppliers	5 verified demo shops, inventory stock, merchant cabinet (private login)
Admin	Users, shops, orders, payouts, support tickets (private login)
Security base	JWT auth, role model, pilot mode without Stripe/Redis for cheap hosting
Ops	Docker + Render Starter (no cold sleep), Neon Postgres, migrate-on-boot

3. Technology

NestJS 11 API · Prisma 6 · PostgreSQL (Neon) · JWT auth · RFQ/orders/ledger modules · Docker single-service deploy · Optional Next.js web app in monorepo · Pilot mode (ALLOW_PILOT) for production without Stripe/Redis/Meilisearch.

4. Commercial framing (not a company valuation)

Metric	Range	Notes
Rebuild cost (indicative)	12-20M RUB / \$80-160k	Custom agency, 12-20 PM
Fair IP / code asset	\$80-150k 7-14M RUB	Quality + docs + tests
Listing guidance	~15M RUB	Negotiable + handover
Hosting (demo)	~\$7/mo Render Starter	Always-on public demo

5. What is public vs private

PUBLIC: catalog, product, cart, RFQ create, request-demo form, clean sign-in (no passwords on page).
PRIVATE (NDA / scheduled walkthrough): temporary logins for buyer, merchant, super-admin; full RFQ award, seller stock/orders, admin payouts/support. Source access after NDA.
